IS YOUR SENSITIVE DATA AT RISK?

Company policy and governmental regulations generally require that computer data be handled in a secure manner.

Eliminate Risk...

Safeguard Critical Company & Client Data

- ▶ ITSource offers services to destroy all data, programs, and operating systems residing on all types of electronic media.
- ▶ Standard Data Destruction Services (DDS) renders all data un-usable on functional hard drives / non-functional hard drives and removable media are destroyed, making data recovery impossible.
- ▶ Department of Defense data wiping services, in accordance with Mil DOD Spec 5220-22M 3, including a 3 pass overwrite and certification on functional media.

Safeguard Reputation & Eliminate Liability

- ▶ Upholding reputation is important to every company. In fact, it is the importance of company reputation that brings fear into the process of retiring IT assets. Every company wonders:
 - Will our equipment be disposed of properly?
 - Will our critical company data really be destroyed?
 - Will our retired assets eventually come back and haunt us with litigation charges or land fill clean-up fees?
- ▶ All customers are provided the basics:
 - Transfer of liability documentation
 - Serialized inventory
 - Asset tag removal services
 - Data destruction certificates, and the guarantee that all equipment is recycled in compliance with EPA and HIPAA.
- ▶ The knowledgeable personnel at ITSource will work with you personally to manage your assets the way you want them to be managed.
